SUMMARY

I am a student of Computer Science undergraduate specialising in Artificial Intelligence. As a fresher, I am eager to implement my skills on real-world projects. I am seeking an entry-level Full Stack Developer role to gain hands-on experience in front-end development, core Data Structures & Algorithms, and modern web frameworks.

EDUCATION

SR Group of Institutions (AKTU) Lucknow, India

Bachelor of Technology in Computer Science and Engineering (Spec. in Artificial Intelligence) 2023 – 2027

- CGPA: 7.92

SKILLS

Technical Skills:

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js
- **Backend:** MongoDB, SQL
- **Tools & Version Control:** GitHub, VS Code
- **Core Concepts:** Data Structures & Algorithms (Arrays,string ,function Problem Solving)

Soft Skills:

Quick Learner

-Adaptable

-Team Worker

-Technical Communication

-Problem Solving

PROJECTS

Responsive Developer Portfolio | *HTML5, CSS3, JavaScript, Git* | Link

- Designed and deployed a responsive personal portfolio showcasing technical skills, projects, and external profiles.
- Optimized layout across mobile, tablet, and desktop interfaces using dynamic CSS media queries and flexbox.
- Integrated interactive elements and direct links to GitHub, LinkedIn, and coding platform profiles.

Blinkit Clone Web Application | *HTML5, CSS3, JavaScript* | Link

- Developed a frontend web application replica of the Blinkit platform focusing on quick-commerce UI/UX.
- Implemented dynamic product display layouts, custom navigation elements, and interactive user interface components.
- Utilized semantic HTML5 and modular CSS to build clean, maintainable, and responsive web pages.

TRAINING & CERTIFICATIONS

Full Stack Web Development & DSA Training – *AccioJob*

- Underwent rigorous training focused on Data Structures, Algorithms, and Core Computer Science fundamentals.
- Built practical web projects using modern front-end concepts and hands-on coding exercises.
